at 4 continents  
over 28 years.**

# SEJOUR

Incoming Agency Software

Sejour™ Incoming Agency Program is a package program offering straight, creative and economical solutions to travel agencies in the tourism industry to enable them easily track their operations. Sejour™ acquires the required infrastructure in order an agency can run all the daily operations with the menus designed uniquely and specifically for the existing departments of an agency. Contract, Reservation, Operation, Tours and Invoicing Main Modules give every department the opportunity to track daily workflow easily by minimizing the operational circulation. Therefore the operational workload diminishes while the efficiency in follow up increases.

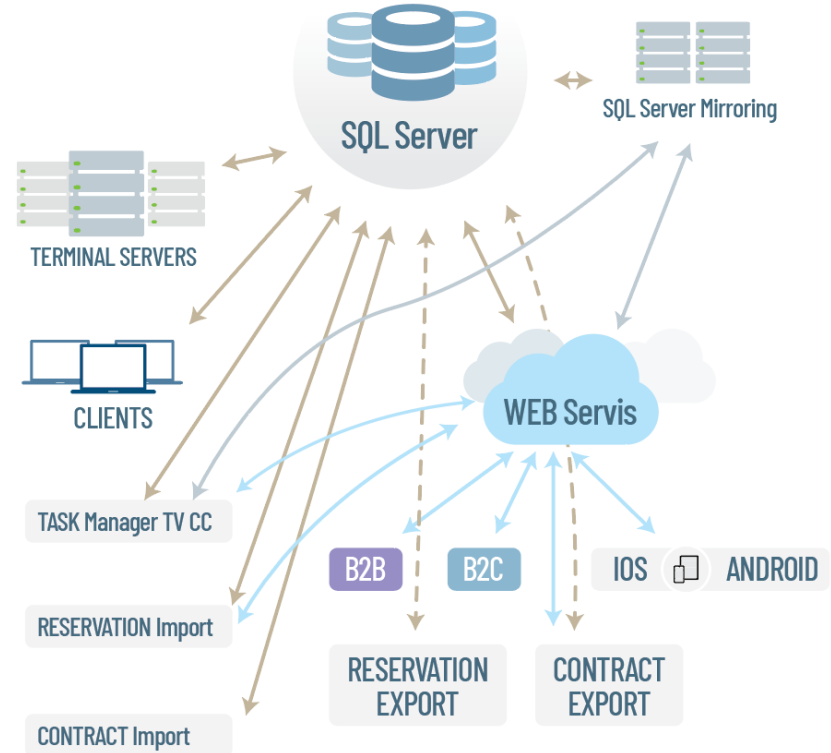

Thanks to the different range of markets where it's being used, Sejour™ supports variable contract and special offer entries as well as offering all the solutions for completing seasonal preparations. Sejour™ highlights its distinction in the market with its dynamic structure that keeps contently developing based on the sectorial requirements and with its remarkable experience since 1992. Users can access the system in the office as well as in any location outside the office with an internet connection easily.

With the new generation integrations, Sejour™ succeeded to be the first trademark of tourism software in minds by adjusting the rapidly developing structure of the daily technologies. Through the sales performance reports and user statistics it provides, Sejour™ aims to positively affect the efficiency and profitability of each and every agency.

# Technology and Architecture

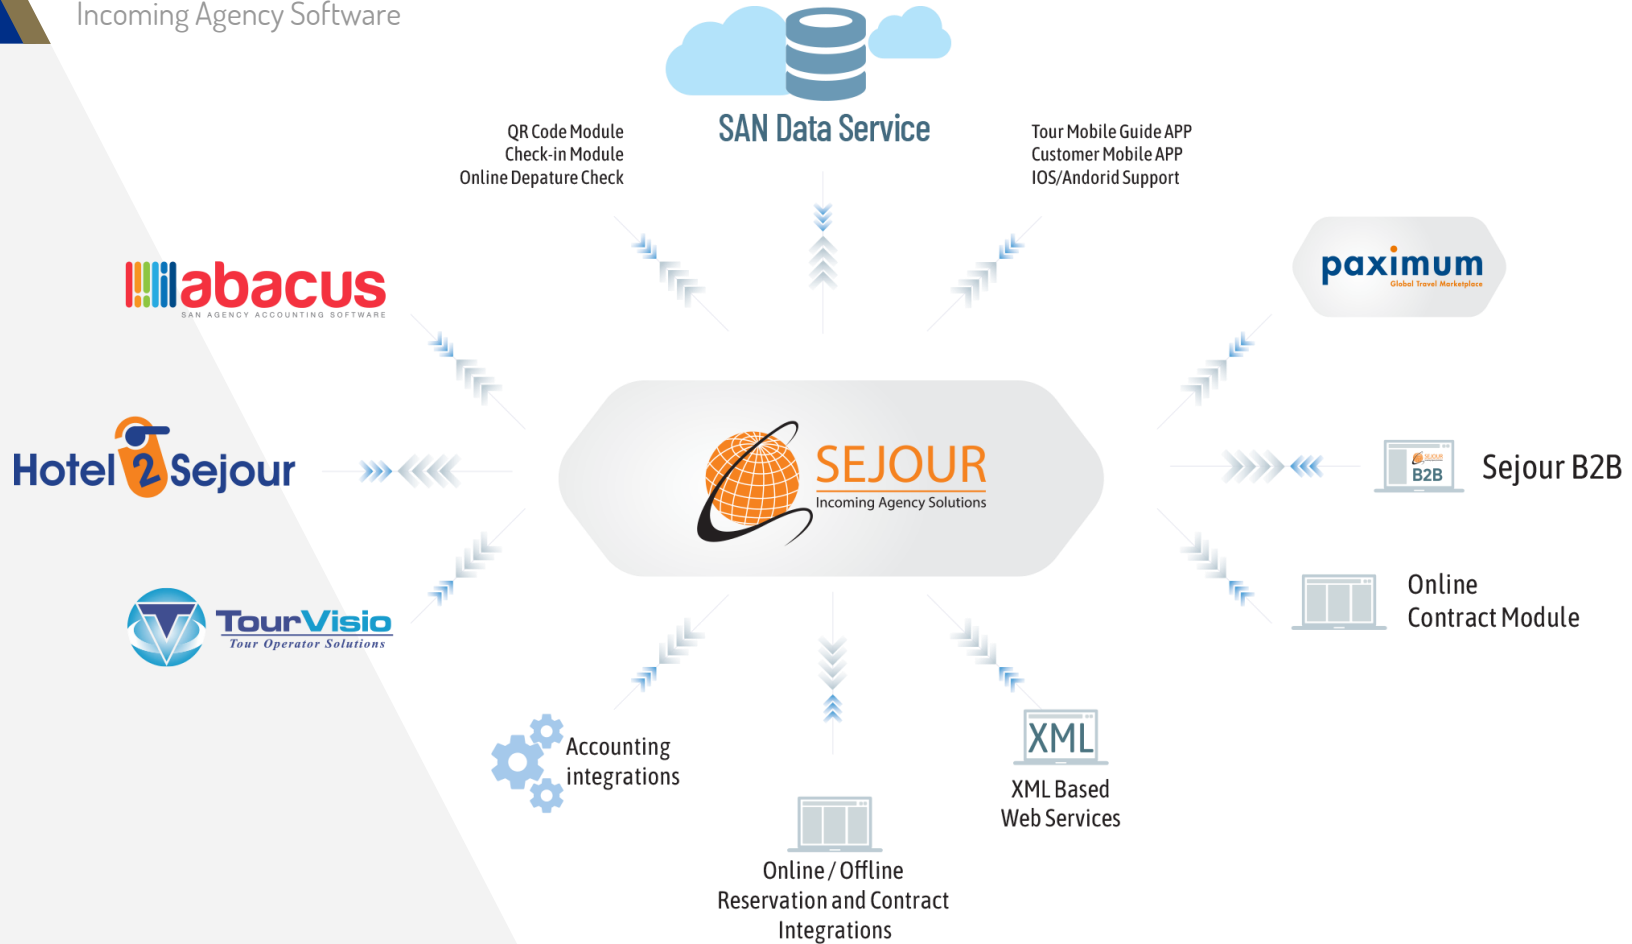

Current Technology - SEJOUR

- Code base: Delphi
- ASP.net infrastructure for MVC WEB services (B2B,B2C)
- SOAP, REST for data transfer
- MSSQL database, REDIS database, Elastic Database
- Desktop application code base Delphi
- Xcode for Mobile IOS applications
- Android Studio for Mobile Android applications
- Windows Service applications working through TVCC task

# SEJOUR ECOSYSTEM

Incoming Agency Software

The online reservation module supplies quick and reliable reservation flow by performing as a bridge between the travel agencies and their abroad partners, Tour Operators. The travel agency provides its tour operator the credentials to access the online reservation system and the tour operator can insert bookings quickly by filtering the preferred criteria over their own prices. The bookings inserted via B2B are instantly reflected to Sejour. This gives the agencies the change to save important expenses such as staff, communication and time as the sales are directly reflected to agency as soon as the sales is done via web.

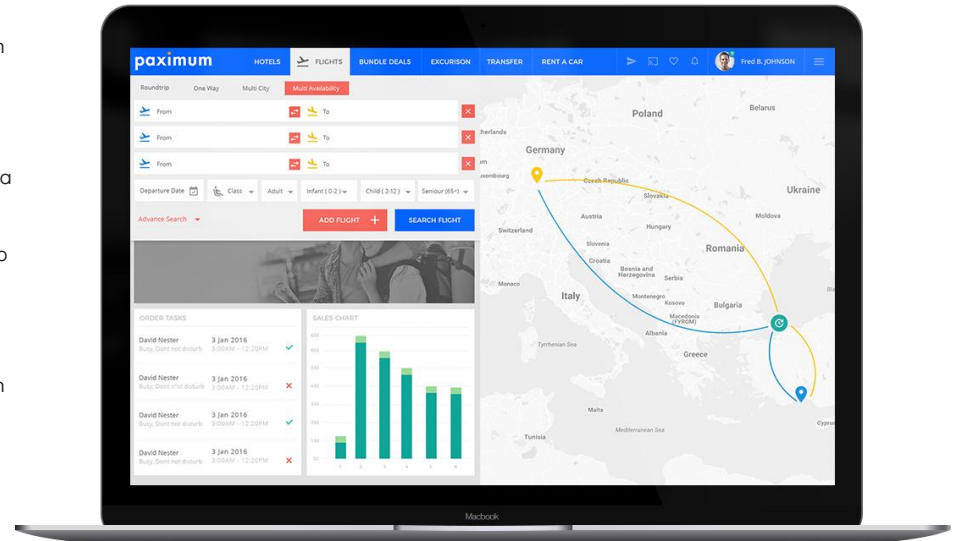

There is a QR Code in the vouchers given to guests via Sejour B2B Web module, it can be read via mobile devices and the guest information can be monitored on the screen thus the airport operation can be run much more easily ( assigned vehicle, guide, etc.). What's more "arrived" info of the guest can be e-mailed automatically both to agency and operator.

Documents such as reservation form, voucher and proforma invoice copies are easy to print via B2B. Variable languages such as English, German, Russian, Turkish are available. Depending on the request, Credit card payment system can be integrated into the web module in order to help guarantee the agency payments.

There is a QR Code in the vouchers given to guests via Sejour B2B Web module, it can be read via mobile devices and the guest information can be monitored on the screen thus the airport operation can be run much more easily ( assigned vehicle, guide, etc.). What's more "arrived" info of the guest can be e-mailed automatically both to agency and operator.

Documents such as reservation form, voucher and proforma invoice copies are easy to print via B2B. Variable languages such as English, German, Russian, Turkish are available. Depending on the request, Credit card payment system can be integrated into the web module in order to help guarantee the agency payments.

Additionally operators can give access to their sub agencies to the application with limited authorization and raise sales by helping them reach to a wider mass.

## Reservation Import Module

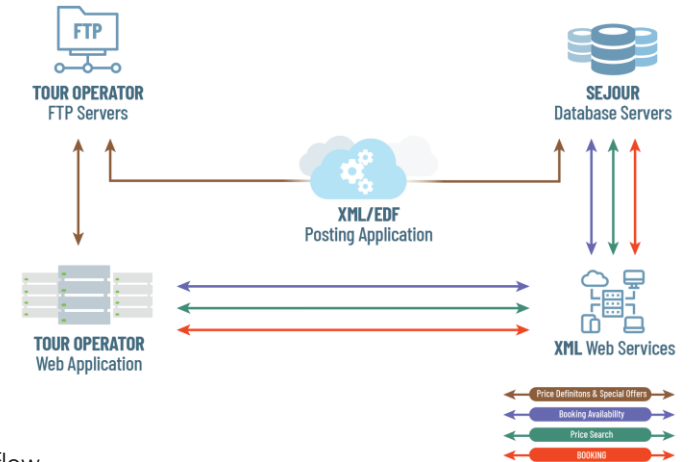

This module is developed with the purpose of cumulative import of bookings received from operators with different formats and file types. This integrated solution is developed specifically for every agency and aims to eliminate the human mistake possibility during manual data entry. The reservation records are created much quicker and accurate with this import structure. This also helps the reservations department to save time so that they can use their time more efficiently. Once the import is completed, the list of changes, cancelations and new bookings can be extracted, and all daily arrived booking, can be followed up easily.

## XML Connectivity

Sejour Agency Program operates integrated with the modern systems of today. XML data transfer provides the xml export of room rates, special offers, stop sales, etc., as well as all the contract elements.

## Sejour to Sejour Reservation

**Import Module** This module is an integrated solution providing an automatic reservation flow between Sejour using agencies, there by disburdens the department and help them use their time more efficiently. Usually preferred by Sejour using operational partners in different regions in order to save their time.

This integrated module provides the “Real time notifications” between guide and the center office regarding mobile guide tour sales via Android & IOS tablets and smart phones.

#### By using Tour Sales Tablet Application

Guides are now allowed to REMOTELY  
Access the in-house lists  
Track the open sale tours  
And print out tickets

#### And tour operation department can easily

Track the tour sales  
Perform operational adjustments  
Control guide efficiency, tour sales revenues  
INSTANTLY from Sejour so that they can serve faster and more efficiently to their clients

With this IOS and Android application, an agency can provide unique services from air transportation to hotel accommodation, from car rental to daily cultural and historical tours and private or local activities direct to its customers. Also can send notifications, messages to its clients for keeping their attention during their stay.

This Application can be customized according to the requirements of an agency as a new project.

# SAN FLIGHT

Unified Airline XML Gateway

THE FUTURE OF TRAVEL

New Generation Flight System  
Next Generation Flight Ticket System

### Unified Airline XML Gateway

**SanFlight** is an online air ticket sales system that provides all airlines and GDSs on a single platform, providing a new generation of solutions for flight ticket sales of travel agencies and tour operators that are IATA accredited or non-IATA agencies.

We are developing the latest booking technology for travel agents.

In addition to the common GDSs such as Amadeus, Sabre, Travelport, we also offer Turkish Airlines-Anadolu Jet (WebAgent), Pegasus, OnurAir, SunExpress, Travelfusion and so on..

### GDSs:

- ▶ Amadeus
- ▶ Sabre
- ▶ Travelport

### Wholesaler:

- ▶ Babylon
- ▶ Biletbank
- ▶ Nemo Travel
- ▶ CityNet
- ▶ Toursys

### Domestic Airline:

- ▶ Turkish Airlines
- ▶ Pegasus (NDC 17.2)
- ▶ Sunexpress
- ▶ Corendon
- ▶ OnurAir

### International Airline:

- ▶ Pobeda Airlines
- ▶ Air Arabia
- ▶ British Airways (NDC 17.2)
- ▶ KamAir

### Charters:

- ▶ Travelfusion (LCC)
- ▶ Tourvisio Charters
- ▶ Involatus (Charter Flights)
- ▶ ITT (Charter Flights)

### Ongoing integrations:

- ▶ AerTicket
- ▶ Fare Logix NDC
  - ▶ Emirates
  - ▶ Aegean
- ▶ Singapur Airlines NDC
- ▶ AirFrance- KLM NDC

# TOURVISIO

Tour Operator Software

TourVisio™ Tour Operator Software is a comprehensive Tour operator solution written using the latest technology . We have dedicated team of developers who understand the unique way of the tourism industry, we can easily understand needs of our customers which in turn produces a fast solution turn around . As we only do tourism development we can concentrate on our customers specific needs in this area(industry). What is the difference of TourVisio™ against competitors ? We are really good at what we do! This means , our software can make instantly changes to sale prices on the all sale channels so Back Office +B2B + B2C can be done in a minutes, just by few clicks.

TourVisio™ can manage within the same data-base and server lots of countries( market) , you don't need to do same definitions for each market from Cost part.

It's enough to open only hotel one time then every market can use same hotel while preparing holiday package with their own profit rules.

Beside pricing transactions, TourVisio provide Reporting for multi needs (Cost Reports, Statistical Reports , many more...) with diagrams , sheets, so reports are clear and easy to produce plus read.

Monitoring of operations (Reservation monitor which we call it Boss Monitor, Flight Monitor, Hotel Allotment Monitor , Flight Optimization Monitor and many more...) each user can decide their own options on all monitors and accounting transactions ( Journal , Invoice Monitor, Agency Payment Follow-up and so on .

We offer also extra modules which can be added to TourVisio™ ... for example : Bonus Module, Transport Module, Flight Seat c-in module, Tvxml Export Module, Hotel Sale Module, We are providing xml and web services.

TourVisio™ Tour Operator Automation enables integration with accounting programs, plus bank integration as well as payment channels.

TourVisio™ Tour Operator Automation is requesting minimum Microsoft SQL 2008 R2 or upper version as data-base. Also possible to use TourVisio™ on cloud servers.

You can start getting reservations via your website that could be designed by either our web department or your own programmer which is fully integrated with our Back-office programme.

All commercial services & products can be promoted in details (Texts, pictures, video, 360 Photograph, Map, etc.) in your web site.

You can present your main and extra services during the reservation according to users' demand. With the rapidly upgraded 'user controls' you can improve your website and choose from the different publicity options.

You can work via integrated social media groups (Twitter, Facebook). If you wish you can immediately sell your pricewise reduced products with the social shopping module.

Any payment instruments (VPOS, PayPal, etc.) can be connected to CMS & B2C system with the possibility of receiving partial payments. If wanted, request basis products can be sold and later user can enter the system to make the payment of the confirmed reservation and can have the documents' printouts.

At the same time SAN CMS supports the online reservation cancellations and changes in parametrical way.

TourVisio™ integrated B2B module allows you present and sell; Flight & Hotel, Cruise, Culture Tour, Bus, Long Stay, Excursion, Transfer and all related extra services to your agencies in more than one market (country). With the preferred payment tools, (Virtual POS, etc.) you can arrange the current accounting transactions. All necessary documents for clients and market languages are specially designed & implemented for your company.

All the reservations made via B2B are recorded instantly to the back-office. According to your release definitions which applied for the agencies or markets, you can avoid losses.

By using reservation & payment monitors as well as bonus programme, you can easily follow and increase profit margins of the reservations made by the agencies.

B2B agencies can finalize search results at B2B which was made via B2C with integration of both web modules. Announcing system allows you to advertise discounts & actions and also can chat about the reservations via B2B channel. TourVisio™ B2B easily allows your tour operator to continue trading with the agencies.

# PAXIMUM

Global Travel Marketplace

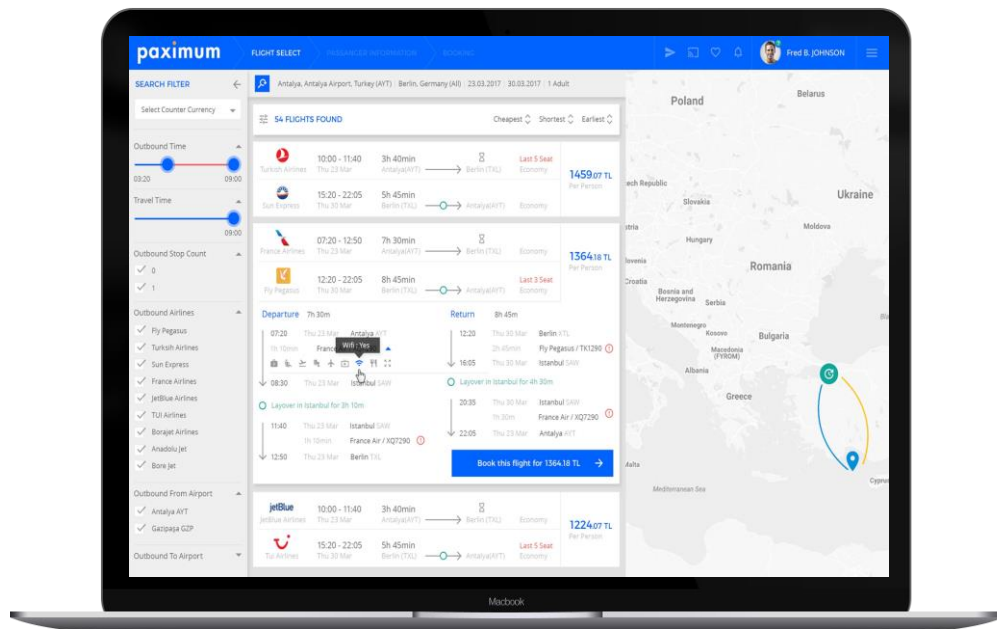

Paximum is an accommodation wholesaler offering more than 350.000 hotels from 35.000 destinations with b2b conditions to buyers via its reliable cloud based infrastructure. Inventory is integrated with both major global providers such as Hotelbeds, Tourico, GTA, +more and local DMC Consolidator Sejour Gateway provided by San TSG including more than 100 DMCs from leisure destinations.

In the beginning of 2015, Paximum was launched to generate big value to suppliers and buyers with its unique potential partner background, because of its shareholder company, San Tourism Software Group which offers back office systems for DMCs and Outbound Tour Operators in 74 Countries for 28 years.

Paximum is entirely developed by Paximum technology development team. Fast and reliable real time inventory that run through cloud based infrastructure is enabled to provide XML / API and other data formats especially for German travel technology providers such as Traso, Bewotec, eMind, Peakwork.

Paximum buyers are mainly Tour Operators and Wholesalers. Tour Operators which use TourVisio back Office systems provided by San TSG, are able to offer global hotel inventory to their b2b retail clients.

DMC Consolidator Sejour Gateway is one of the biggest outstanding value of Paximum by containing unique local DMC products currently offering almost 3000 hotels from 100 DMCs so far.

# ABACUS

Agency Accounting Software

We considered your requests and developed a solution for your accounting needs. Our proficiency in tourism industry leads us to offer you the perfect choice for agency accounting.

Now everywhere is your Office!

Through the use of API structure, no matter where you are, your business is with you.

Reduce the work of the Accounting & Finance Department!

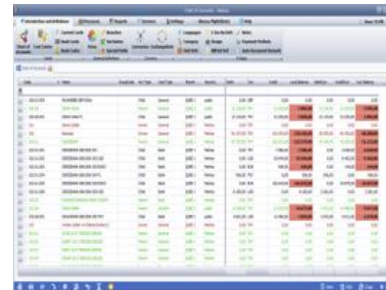

Abacus, is fully integrated with TourVisio and Sejour. With Abacus, operational records (purchases, sales, receipts and payments) are easily accounted. It will increase the efficiency of the accounting department and reporting capabilities.

Now, Foreign currency accounting is very easy!

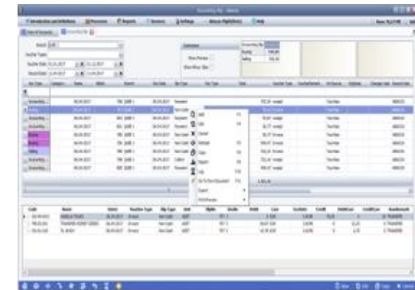

Transactions with different currencies will not cause confusion with Abacus. You can review your account balances in original currencies or convert any currency with creation date values. You can easily revalue your accounts and calculate exchange differences with just a few clicks.

Print your sales invoices with single click!

Your sales invoices, no matter what size and format, easily printable with Abacus document design feature.

With well earned respect, I confidently recommend SAN Tourism Software Group for future tour operator software projects like Tourvisio, B2B, B2C, and other agency and tour operator projects. I want to thank you for your exceptional work during our turnaround. Your hard work and dedication to the job was an integral part of the successful completion of the project.

We have been working with SAN Tourism Software Group for the past eight years and have always been completely satisfied with their performance. They do an excellent job, are always punctual, and offer the most competitive solutions for tour operators software, B2B and B2C.

SAN Tourism Software Group, are largely responsible for the dramatic increase in sales for the past 8 years, and for the resulting increase in profits for the business. Their support team is easy to work with, thinks creatively, and effectively communicates their ideas. SAN Tourism Software Group has been a true game-changer in identifying and enhancing the areas of our software and websites that weren't performing as well as they could have.

The staff at SAN Tourism Software Group is knowledgeable, courteous, and friendly. They truly care about every detail.

SAN Tourism Software Group has become a role model to several new entrants in the market. They have a great reputation in the industry for offering the best solutions for tour operators. Their customer support is excellent, and their staff members are trained thoroughly. All these factors are responsible for making them successful in the business.

I'm happy to recommend the services of SAN Tourism Software Group. If you have any questions, please feel free to contact us.

Sincerely,  
 Enver Babat  
 Managing Director

11<sup>th</sup> January 2019

Dear Erol Turk,

I would like to thank you on behalf of TUI Russia & CIS for the cooperation with us. It is really a great pleasure for us to become partners with such a high standard firm like SAN Tourism Software Group. Your well-known reputation with many years of experience in the travel sector with Sejour made us prefer your software solutions and we believe that it was the right choice. We are sure that our cooperation will lead us to success among the other travel agencies.

We would like to thank you again and wish all the best to SAN T.S.G. team.

Kind Regards,  
 TUI Russia & CIS

### Certificate of Appreciation

To: Mr Haydar Soyaslan

We thank you for your great efforts in supporting Qasswa migration to the future using SAN software.

Your great support and kindness helped us achieve this great milestone, we look forward to more achievements.

Ebraheem Hashem

Qasswa.com  

First of all I would like to thank you for maintaining an aspect of corporate business from an equal distance to all firms without any differentiation and no matter what with the approach of customer satisfaction. Despite being in the industry for 30 years this is the first time that I embraced a firm for being so professional and for efficacious customer relations. This led me to trust your firm San Computer more and more and create great projects together. One of the most appealing quality of your firm is after sales support. Whenever an address is needed for friends in business, Sejour is the first name in mind.

**Serdar Bayraktar**

Penelope Travel / General Manager

We have been using Sejour actively for many years in our firm. We are very much pleased with cost calculations and management, and statistical support and profitability control, as well as its practical structure. Additionally, the service; about technical support being continuous, on time, supportive and innovative, raised our satisfaction.

We thank to all firm members.

**Nadi Ören**

Pamfilya Tourism Inc. / IT Manager

Dear San TSG Family, we thank each one of you one by one for all the support and advices that enabled us to accelerate our labor force in the impetuous and competitive environment of the tourism industry.

**Ahu Koçlar**

Otis Travel
